AIM:

To write a basic Servlet program that demonstrates the use of Java Servlets by printing "Hello, World!" when accessed through a browser.

ALGORITHM:

1. Input:

The user makes an HTTP request (usually by entering a URL) through a browser.

2. Servlet Program Flow:

1. Create a Servlet Class:

- o Define a Java class that extends the HttpServlet class.
- o Override the doGet() method, which handles HTTP GET requests from the client (browser).

2. Handle HTTP Request:

- o In the doGet() method:

Get the PrintWriter object to write the response to the browser.

Set the response content type to text/html.

Write the "Hello, World!" message to the response.

3. Compile the Servlet Class:

- o Compile the Java Servlet file using the javac command to generate a .class file.

4. Deploy the Servlet:

- o Place the compiled servlet class file in the appropriate directory of the web application (typically in the /WEB-INF/classes folder).
- o Configure the servlet in the web.xml file of the web application or use annotations.

5. Access the Servlet via Browser:

- o Start the Apache Tomcat or another servlet container.
- o Access the servlet by entering the appropriate URL (e.g., <http://localhost:8080/your-webapp/hello>).

CODE:

Servlet code:

```
package WTMA;
import java.io.IOException;
import java.io.PrintWriter;
import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;

@WebServlet("/reservation")
public class exp3 extends HttpServlet {
    private static final long serialVersionUID = 1L;
    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html");
        response.setCharacterEncoding("UTF-8");
        PrintWriter out = response.getWriter();
        out.println("<!DOCTYPE html>");
        out.println("<html>");
        out.println("<head><title>Online Railway Reservation System</title>");
        out.println("<style>");
        out.println("  body { background-color: #1a1a2e; font-family: Arial, sans-serif;");
        out.println("    padding: 30px; color: #e0e0e0; }");
        out.println("  h1 { color: #00b4d8; }");
        out.println("  h2 { color: #48cae4; }");
        out.println("  hr { border: 1px solid #00b4d8; }");
        out.println("  ul { background-color: #16213e; padding: 15px 30px; border-left:");
        out.println("    4px solid #00b4d8; border-radius: 4px; }");
        out.println("  li { margin: 6px 0; color: #caf0f8; }");
        out.println("  strong { color: #f4a261; }");
        out.println("  a { color: #90e0ef; }");
        out.println("  a:hover { color: #00b4d8; }");
        out.println("  em { color: #aaaaaa; }");
        out.println("  p { color: #cccccc; }");
        out.println("</style>");
        out.println("</head>");
        out.println("<body>");
        out.println("<center><h1>Welcome to the Online Railway Reservation");
        out.println("System</h1></center>");
        out.println("<hr>");
        out.println("<p>Book your train tickets quickly, safely, and conveniently from");
        out.println("anywhere.</p>");
        out.println("<h2>Available Services:</h2>");
        out.println("<ul>");
        out.println("  <li>Train Ticket Booking</li>");
        out.println("  <li>Seat Availability Check</li>");
        out.println("  <li>PNR Status Enquiry</li>");
```

```

out.println(" <li>Ticket Cancellation & Refund</li>");
out.println(" <li>Train Schedule & Timetable</li>");
out.println("</ul>");
out.println("<h2>Reservation Status:</h2>");
out.println("<p>Status: <strong>Open for Bookings</strong></p>");
out.println("<p>Booking Window: <strong>Up to 120 days in  
advance</strong></p>");
out.println("<p>For assistance, contact us at: <a  
href='mailto:support@railwayreservation.com'>support@railwayreservation.com</a>  
</p>");
out.println("<hr>");
out.println("<p><em>Thank you for choosing our Online Railway Reservation  
System. Have a safe journey!</em></p>");
out.println("</body>");
out.println("</html>");
}
}

```

OUTPUT:

Welcome to the Online Railway Reservation System

Book your train tickets quickly, safely, and conveniently from anywhere.

Available Services:

- Train Ticket Booking
- Seat Availability Check
- PNR Status Enquiry
- Ticket Cancellation & Refund
- Train Schedule & Timetable

Reservation Status:

Status: **Open for Bookings**

Booking Window: **Up to 120 days in advance**

For assistance, contact us at: support@railwayreservation.com

Thank you for choosing our Online Railway Reservation System. Have a safe journey!

RESULT:

The browser will display the message "Hello, World!" returned by the Servlet.
